

# IEL report

- 開催日 Date&Time : 23<sup>rd</sup> April 2020 10:00-11:00 ( 1 hour)
- タイトル Title : How to apply and get JSPS? Real experiences
- 主催 Coordinator : GSDM Student Committee
- 参加人数 Attendance : 15 人
- 報告 Report :

It was an excellent chance to share the knowledge of students who got JSPS with other students. Firstly, the coordinator made presentations about the administrative procedure of JSPS and how to fill out application forms. Since four Student Committee members got JSPS among participants, all of us shared our experience and documents with participants. Afterward, students who are planning to apply JSPS asked some questions regarding the contents of application forms.

Overall, we have concluded that showing linkage with previous studies and the feasibility of your research is an essential thing for writing. Making attracting figures and discussing the contents with many people were also found to be crucial. We also have agreed with the value to include GSDM activities in the application form. In the QA session, one student asked about how to differentiate the things to be written in different sessions because requirements seem to be similar. Also, another student concerned about publication or current results because she changed the lab from her master course. We talked that reviewers want to know your research skills, so whether people changed the lab or not is not important.

The IEL was finished successfully. We feel that GSDM is a good community to discuss JSPS applications.
